OPEN HOUSE SATURDAY, FEBRUARY 3RD – NOON TO 4:00 PM BY APPOINTMENT

ONLINE SALE – WEDNESDAY, FEBRUARY 7, 2024

BIDDING CLOSSES AT 7:00 PM ON FEB. 7! JOIN US!

The Schoenfelds

Thank you for your interest in the Circle S Cattle Co. - Power on the Prairie bull sale. We have worked 16 years striving to produce cattle that combine form and function for the beef industry. The focus has been on combining phenotype as well as genotype to produce predictable cattle. We work to produce bulls that have an EPD profile above breed average and feel confident that this produces consistency in your operation as well.

All bulls selling for \$3000 or more will be maintained until May 1 at no extra cost. All bulls will go through a breeding soundness exam prior to delivery. We guarantee all bulls for the first breeding season. This guarantee is not insurance or mortality policy, but a guarantee on functional fertility. Buyer assumes all risks for injury due to running bulls together or management decisions outside genetic control. For the guarantee to apply we ask you communicate with us as soon as there is a known problem. We will attempt to find a suitable replacement if necessary or credit minus salvage value will be issued for use in a future sale. For bulls staying at Circle S we recommend the buyer acquires insurance and we can assist with that.

We will assist in helping clients find transportation for their bulls. All bulls sold within a 250 mile radius will be delivered free of charge.

We follow a very strict vaccination program using modified live vaccines. We are also a Johnes negative herd and have been monitoring our cattle for leukosis virus.

This extremely long spined big outlined 18-month-old bull is tag 957. He reminds me a lot of his sire when we purchased him from Triangle J Ranch, and he has developed into a great herd sire. This bull will throw some very productive feedlot cattle and has the potential to provide some great daughters for your operation as well. This bull is more nervous and may be better suited for a larger operation.

This mating flat out works! Tag 856 is the other 18-month-old bull in the offering. For the 3rd year in a row this cow has placed another bull in the offering that simply just spells pounds and production. He is an absolute teddy bear as was his brothers. We get paid in pounds in the beef industry and he will certainly add plenty of those to your calf crop.

One of my favorites and the other baldy bull in the offering. This bull has the look and style to make some amazing replacement heifers. A really balanced set of EPDs. He combines rib shape, muscle and look in such a unique package. The cow family here has had a ton of longevity in our operation. He is out a first calf heifer and had a weaning ratio of 103.

One of our favorite cows, 406, did it again this time settling to the infamous OMF Epic. This calving ease sire didn't take the best picture, but he is so quiet and docile, NOTHING would get him interested in picking his head up. He is still a big topped, stout hipped bull that will add product to a set of angus based cows. He has several maternal brothers working around the country including CSCC Easy Money our mature herd sire.

OMF EPIC E27, SIRE

This purebred bull has the most balanced set of EPDs in the offering. He is another OMF Epic son that reminds me a lot of the lot 4. When we use OMF Epic in our operation, this is the type of bulls we expect to raise. He is bold in his rib cage, level down his top and hip, and possesses the added muscle many are looking for. He will live up to his numbers.

An ET calf that combines one of the more popular herd bulls in the country with one of the best cows ever to come out of the Hook Farms operation. Hook's Bella may have been under utilized during her career, but those that know her, love her. This bull has been getting more and more impressive every day. He is the biggest framed of the yearling bulls. Long spined and still has above average muscle. Pay attention, this bull is in the top 2% for WW and YW EPD and based on what I have seen he is living up to that.

Just because he is lot 7 in the sale doesn't mean he should be overlooked. This super stylish bull has been impressive all year long. He hit the ground, hit the gas and never stopped. His WW ratio of 107 is a testament to that. Another very consistent set of EPDs on this bull that provide for great weaning and yearling growth potential. This is another one that could give you some great performance in your calf crop.
